

International Conference on Dynamics of Differential Equations

March 16-20, 2013

Klaus building, 266 Ferst Drive

hale-conf.gatech.edu

The conference begins on March 16 and continues to March 20.

Plenary speakers:

Andrea Bertozzi

Alexandre Carvalho

Magnus Egerstedt

Giorgio Fusco

Melissa Kemp

Weishi Liu

Roger Nussbaum

Evelyn Sander

Bjorn Sandstede

Wenxian Shen

Gigliola Staffilani

Hans-Otto Walther

Sijue Wu

March 15: Everyone, especially graduate students and young researchers, is invited to attend four two-hour tutorials.

Rafael de la Llave

The theory of quasi-periodic motions (KAM theory): rigorous and computational aspects

John Mallet-Paret

Dynamics of delay differential equations

Konstantin Mischaikow

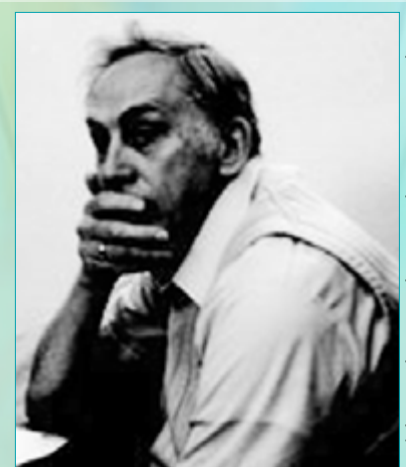

Computational topology and dynamics

George Sell

Dynamics of partial differential equations

This conference is dedicated to the memory of Jack Hale.

Genevieve Raugel will deliver two Hale memorial lectures.
